PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in Python, SQL, data analysis, data visualization, and machine learning. Skilled in data preprocessing, exploratory analysis, identifying patterns, and developing data-driven solutions. Completed projects in blood donation prediction and e-commerce application development, with a strong interest in transforming data into actionable insights.

EDUCATION

Master of Computer Applications (MCA)

LJ University, Ahmedabad | Expected Graduation: 2027

Bachelor of Computer Applications (BCA)

Indus University, Ahmedabad | CGPA: 6.65 / 10.0 | Graduated: Aug 2024

TECHNICAL SKILLS

Data Analytics: Python, SQL, Pandas, Scikit-learn, Data Analysis, Data Preprocessing, Data Visualization

Databases: MySQL, MongoDB

Programming & Web: C, C++, JavaScript, HTML, CSS

Tools: Git, GitHub, VS Code, Antigravity IDE

PROJECTS

Blood Donation Prediction | Python, Pandas, Scikit-learn, Machine Learning

- Analyzed historical blood donation data from a mobile blood donation campaign to predict whether donors would donate during a future visit.
- Performed data inspection and preparation using Pandas, including dataset profiling, target-variable preparation, and analysis of target-class distribution.
- Applied stratified train-test splitting to preserve the original class distribution across training and testing datasets.
- Framed the problem as a binary classification task using donor behavior variables including recency, donation frequency, total blood donated, and time since first donation.

SkinFits E-commerce Web Application | Web Development, Database, UI/UX

- Developed a complete e-commerce web application for browsing and purchasing fashion products.
- Designed and implemented core system modules including user management, product management, shopping/cart workflows, and reporting.
- Designed the application's database structure and data dictionary to support management of users, products, and transactions.
- Developed the user interface and system workflows, supported by Use Case Diagrams and structured system design documentation.
